# Iberian Peninsula (Spain and Portugal) Food-processing Ingredients Sector Annual 2006

Approved by:

Stephen Hammond U.S. Embassy

Prepared by:

Maria do Monte Gomes Laura Jerez

# **Report Highlights:**

The Iberian Peninsula food-processing sector is one of the most vibrant within the European Union. U.S. exporters of food ingredients may find trade opportunities in this market; however, market access requirements can be complicated and at times prohibitive. (MG80LR2SH2)

Includes PSD Changes: No Includes Trade Matrix: No Annual Report Madrid [SP1]

(1) GTA

FAS/Iberia (2) 2005 Estimates and (3) 2006 Forecasts using historical data and FAS/Iberia input, unless otherwise identified.

The Iberian Peninsula food-processing sector modernized and expanded significantly during the last couple of decades. With integration into the European Union in 1986, the Iberian Peninsula food-processing sector began a profound modernization in order to adapt to new EU requirements. Spain and Portugal now have some of the most competitive food

processing industries in Europe, which makes this sector an important target for U.S. food-ingredient exporters.

The Iberian Peninsula food-processing sector in summary:

Modern, with special attention to the quality, safety, and traceability of the food products it produces.

# In Spain this sector:

- Generates just under 20 percent of Spain's total industrial production, accounting for just over eight percent of the national gross domestic product and providing almost 450,000 jobs;
- Is comprised of mostly small companies--about 97 percent of the 32,585 food processors employ less than 50 people; 820 employ between 50 and 200 people; 185 employ between 200 and 500 people; and only 67 food processors employ more than 500 people; and,
- Produces an estimated € 65 billion in product, of which € 13 billion is exported.

In Portugal the food-processing sector:

- Generates about 16 percent of Portugal's total industrial production, accounting for about nine percent of the national gross domestic product and providing an estimated 110,000 jobs;
- Is dominated by even smaller companies—only 11 percent of the 8,500 food processors employ more than 20 people, accounting for about 2/3 of the sector manpower and about 85 percent of the € 12.5 billion in product produced. Just over €1 billion of the final product is exported.

Portugal - FIPA - Portuguese Food Industry Federation

Current market developments affecting the food-processing sector include:

Changes in demographics and working patterns are shifting demand to more convenient and ready-to-eat foods. Due to higher income, people are eating out more often.

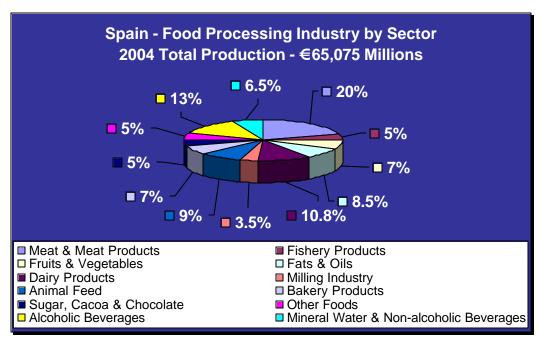

- New, demanding labeling and traceability requirements are forcing consolidation of all levels of the food chain, from farm to fork.
- Consumers have become more health conscious: problems concerning food safety are widely publicized and usually receive immediate attention from government agencies.

# ADVANTAGES AND CHALLENGES FACING U.S. PRODUCTS IN THE IBERIAN PENINSULA

| Advantages   | Challenges   |
|--|--|
| The dynamic IP food-processing sector will continue to grow, creating increased demand for food ingredients. | Food imported from third countries, including the U.S., must comply with EU food law, which varies considerably from U.S. regulation and practice. |
| Food products in the market are becoming more diversified.   | Competition from neighboring EU countries, where tastes and traditional products may be well known.  |
| Good network of agents and importers to help get product into the market.                                    | EU labeling, traceability, and packaging laws and a reluctance to purchase products containing genetically modified ingredients.                   |
| Overall sales of consumer-ready food products continue to expand.  | U.S. exports face higher transportation costs and difficulties in shipping mixed or smaller container loads.                                       |
| Consumers are more health conscious, and tastes are becoming more diversified.                               | High marketing costs (advertising, discounts, etc.) are necessary.   |

# II. ROAD MAP FOR MARKET ENTRY

# A. Entry Strategy

Success in introducing products in the Iberian Peninsula market requires local representation and personal contact. A local representative can provide up-to-date market intelligence, guidance on business practices and trade related laws, sales contact with existing and potential buyers, and market development expertise. The Offices of Agricultural Affairs in Madrid and Lisbon maintain listings of potential importers and are developing sector-specific information to help you introduce your product in the IP market.

We are also developing a series of product-specific market access reports that are/will be available to U.S. exporters (please see <u>SP5037</u> and <u>SP6002</u>). Spain and Portugal generally apply EC rules and regulations. However, there are subtleties that you should learn about if you are thinking of exporting to the IP market. For more information, we invite potential U.S. exporters to contact us for additional, unpublished sector-specific information.

In general terms, U.S. exporters already exporting to other EU Members will likely be meeting most of the requirements for exporting into the IP. The U.S. exporter needs to make contact with an IP importer and/or distributor for his product.

Typically, IP food processors buy their food ingredients from importers or wholesalers. Some large companies buy directly from foreign suppliers. Around 20 percent of the IP food production is sold to export markets, mainly to the EU. Some food-processing companies concentrate on the domestic or on export markets, but most of them will have mixed customers. Companies supplying mainly the domestic market frequently market their products directly and have their own logistics infrastructure. However, their customers will vary from wholesalers to buying groups and retailers. Companies producing for the export market may have their own marketing office overseas, local agents or may work with local importers.

U.S. processed food exporters now face even greater challenges in the IP market, because of the new EC labeling and traceability regulations. Any product that contains genetically modified ingredients must be labeled so that the consumer can distinguish the product. Because, IP consumers don't yet have familiarity with genetically modified foods, food processors, retailers and the HRI sector are reluctant to purchase these processed products or food ingredients for processing.

The following documents are required for ocean or air cargo shipments of foodstuffs to Spain and Portugal:

Bill of Lading and/or Airway Bill

Commercial Invoice

Phytosanitary Certificate and/or Health Certificate when applicable

If your product is or contains plant or animal products, it will require a phytosanitary or health certificate issued by the competent U.S. authority. Also, if you are exporting animal products, your production plant has to be approved to export into the EU.

#### Import Certificate

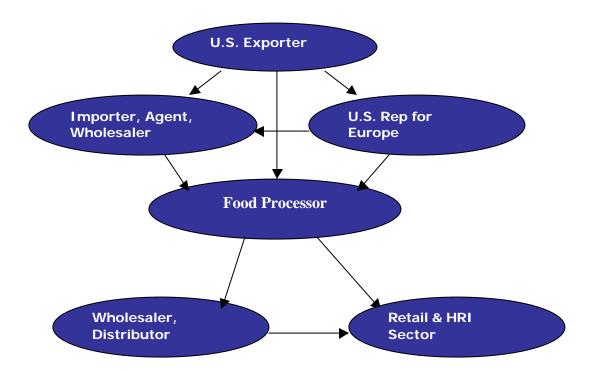

Most food products require an Import Certificate issued by the competent Spanish or Portuguese authority. However, the Import Certificate is obtained by the Spanish or Portuguese importer and/or the agent involved in the business and is intended for tariff classification purposes.

For more information on import and inspection procedures please see SP5020 at <a href="http://www.fas.usda.gov/gainfiles/200507/146130239.doc">http://www.fas.usda.gov/gainfiles/200507/146130239.doc</a> and PO5014 at <a href="http://www.fas.usda.gov/gainfiles/200507/146130240.doc">http://www.fas.usda.gov/gainfiles/200507/146130240.doc</a>.

These reports should be read in conjunction with the equivalent report done by the FAS Office in the U.S. Mission to the European Commission (USEU), E34054 at <a href="http://www.fas.usda.gov/gainfiles/200408/146107373.doc">http://www.fas.usda.gov/gainfiles/200408/146107373.doc</a>.

Also, please check the U.S. Mission to the European Union webpage at <a href="http://www.useu.be/agri/expguide.html">http://www.useu.be/agri/expguide.html</a>, which will guide you on exporting into the EU. For an overview of the EU Food-processing Sector, please check the U.S. Mission to the European Union sector report E35067 at <a href="http://www.fas.usda.gov/gainfiles/200504/146119335.doc">http://www.fas.usda.gov/gainfiles/200504/146119335.doc</a>.

#### **B.** Market Structure

# C. Company Profiles

The Iberian Peninsula food processing has a wide range of food-processing sectors, many of them importing food ingredients.

Spain – Main Companies Operating in the Food-processing Industry – 2004

| Subsector                   | Company                   | Sales<br>(Million €) | End-Use<br>Channels | Procurement Channels |
|-----------------------------|---------------------------|----------------------|---------------------|----------------------|
| Beverage Industry           | Coca-Cola                 | 2,500                | Retail & HRI        | Importers, Direct    |
| Other Foods                 | Ebro Puleva               | 2,071                | Retail & HRI        | Importers, Direct    |
| Dairy Products, Other Foods |                           |                      |                     |                      |
